WORK EXPERIENCE

TechnoComet Solutions | Feb 2024 - Aug 2026

App Developer

- Developed and maintained production mobile applications using Flutter and Kotlin.
- Built multiple applications from scratch, both independently and as part of a 6–7 member development team.
- Implemented new features, integrated REST APIs, Firebase services, WebSockets, and third-party services, and resolved production issues.
- Worked with Clean Architecture, Repository Pattern, and Provider for scalable application development.
- Managed **Google Play Store** deployments, app updates, ownership transfers, and signing-key related issues. Along with **App Store** app updates.
- Collaborated with backend developers and communicated directly with clients to understand requirements and deliver solutions.

EDUCATION

Saint Mary's School | 2015 – 2017

SSC | 59 %

HSC | 65 %

Atmiya Institute of Technology | 2018 – 2022

Bachelor of Computer Application | 89 %

Master of Science in I.T. | 85 %

PROJECTS

Hukup Dating App

- Contributed to a production dating application with a profile-card based user discovery experience.
- Impact:** Solved slow, disengaging swipe experiences with smooth card animations and real-time WebSocket chat — helped drive 5,000+ downloads on Play Store

Maia Care

- Healthcare enterprise appointment scheduling application facilitating visit logs between medical representatives and doctors.
- Impact:** Solved the paper-logbook problem for field reps — replaced manual visit tracking with a digital scheduling system, cutting logging time for medical reps

Listening Eyes

- Developed an accessibility-focused educational app for visually impaired students using Flutter and text-to-speech. Also built the application and supporting admin app single-handedly from scratch.
- Impact:** Solved access to study material for visually impaired students — converted text content into audio navigation for independent learning, reaching 500+ users

SmartBill AI - Receipt Scanner

- AI-powered receipt & expense manager leveraging Gemini AI vision to turn your phone's camera into an automated accountant, instantly extracting merchant, date, amount, and category.
- **Impact:** Solved manual expense entry — turned a multi-minute task into a 5-second camera scan

Miodeal Buyer

- Multi-category e-commerce buyer application for food, electronics, and daily essentials with Dio network optimization and checkout.
- **Impact:** Solved slow, cluttered shopping flows for daily essentials with optimized checkout and network calls — helped drive 100+ downloads

OTHER SKILLS

- **Google Play Store Deployment:** Experienced in Play Console releases, JKS/keystore management & recovery, app updates.
- **Apple App Store Deployment:** Experienced in deploying and managing app updates through App Store Connect.
- **GitHub:** Familiar with version control, repository management, branching, pull requests, and collaborative development using GitHub.
- **AI Development Tools:** Experienced in using ChatGPT, Claude, Gemini, Codex, Cursor, Devin, and Antigravity to accelerate coding, debugging, research, and application development.
